the education of the real estate professional is changing andaligning itself more closely with the world of business this book takes a new approach to property appraisal by exploringthe pricing mechanism in this changing context it develops the notion of the pricing mechanism in relation toproperty covers practical issues of comparison and the real problems inapplying valuation theory explores calculations including social and

environmental worth ignored in other texts as real estate professionals now advise both on strategic and operational aspects of built assets they must take into account practices of other investment markets and see investors as competitors to owner occupiers both owner occupiers and investors have to assess accurately how their buildings perform but also be aware of wider sustainability issues and social and environmental responsibilities real estate appraisal from value to worth meets these new demands by examining the latest techniques of the marketplace developing an understanding of both market appraisal and worth and highlighting the emerging role of sustainability as a driver for decision making in real estate written by a group of highly experienced lecturers and professionals at the cutting edge of investment practice the book has an accessible style and authoritative coverage for both students and practitioners facing changes in established ways of working for supporting material please go to blackwellpublishing.com sayce

this new edition of bestselling textbook introducing property valuation provides students with a comprehensive introduction to the concepts and methods of valuing real estate helping them to progress successfully from basic principles to a more sophisticated understanding taking a practically oriented rather than purely theoretical approach the textbook equips readers with the skills to undertake their own valuation calculations fully updated to reflect recent developments in regulation and practice experienced tutor and valuer michael blackledge demonstrates how the principles can be applied in professional practice in line with the requirements and guidance provided by the international valuation standards council and the royal institution of chartered surveyors online material accompanies the new edition with spreadsheets and pre programmed excel spreadsheets enabling students to prepare their own calculations the five traditional methods of valuation are outlined and the practical applications of the two main approaches the comparison and investment methods are fully explored the use of discounted cash flow and quarterly in advance calculations topics which are not always adequately covered elsewhere are also explained accessibly written with a full range of worked examples case studies clear chapter summaries and extensive further reading suggestions this book is essential for any student of real estate and its valuation
