a description is given of an experimental study the aims of which were to test the feasibility of conducting a multiplicity survey

for marriages and births in israel and to evaluate different counting rules the study included an evaluation survey from which estimates of the components of mean square error were obtained the results indicate that an overall reduction of mean square error was obtained by use of a multiplicity rule instead of a conventional rule the substantial reduction in sampling error attained by the use of multiplicity was not offset by the slight increases in response bias and variance

this book constitutes the refereed proceedings of the third european workshop on case based reasoning ewcbr 96 held in lausanne switzerland in november 1996 case based reasoning is an appealing technique for dealing with the knowledge acquisition bottleneck in computer applications solutions to new problems are found by adapting similar experience from the past called cases the 38 revised full papers presented were carefully selected from a broad variety of submissions after a thorough refereeing process the volume reflects the state of the art in case based reasoning research and applications
