work and learning in microenterprises in the car repair industries of four european community ec countries were examined through 21 case studies of firms with 10 or fewer employees 6 firms in ireland and 5 each in greece the netherlands and spain structured interviews were conducted with each firm s owner and 60 motor vehicle mechanics at the 21 firms firms were not selected randomly rather they were selected because of their active use of training to adapt their staff to technological economic and organizational change the sample included franchise and nonfranchise firms all 21 microfirms studied were simultaneously pursuing growth strategies and the strategy of specialization in networks of the 60 mechanics interviewed 43 had initial vocational education for the sector except for the apprentices all 43 mechanics participated in continuing training during the previous 3 years of the 17 mechanics with no initial training for the sector 10 59 had participated in continuing training and only 7 41 reported learning a great deal from that training many employees developed skills through incidental learning including learning by solving problems individually or with colleagues learning by regular rotation of tasks and learning under the boss or an experienced worker contains 23 tables figures mn

an international team of researchers studied the following aspects of training in spain s motor vehicle repair and sales sector structure and characteristics institutional and social context relationship to spain s overall labor market changing structural economic and organizational conditions and training and recruitment and relationship to spain s education system social and labor employment statistics were analyzed and case studies of three auto dealerships and one authorized vehicle repair center were conducted the firms varied in size however all were linked to large manufacturers consequently all four firms had manufacturer designed systems of continuing training to keep employees current with innovations in new vehicle models no great satisfaction with commercial training was found in any of the case studies in general workers and unions were not involved in training related decisions a

transition from training based on a functional model in which training is viewed as a catalogue of tasks to be performed to a systematic concept in which continuous updating is seen as essential to survival in the sector appeared to be in progress the report includes 49 tables figures and contains 18 references mn

this book summarizes the interim result of the servitization activities in manufacturing industries while the early literature on servitization tended to stress only its advantages more recently scholars have also started to refer to the challenges associated with servitization this book attempts to give a balanced picture of servitization the book is structured in four parts part i introduces the topic by presenting the most recent academic discussion about servitization and uses an empirical analysis to show the degree of servitization across europe the results of this analysis are then compared to the discussion in the literature this comparison highlights the existing discrepancies between the rather euphoric literature and the more skeptical practical experience the second and third parts attempt to explain these discrepancies by taking as a starting point the assumption that servitization recommendations have to consider the heterogeneity of the manufacturing sector and the capabilities of the provider part ii presents articles which analyze the specific characteristics of different sectors with their barriers and potentials and presents frameworks for a successful servitization of the core sectors in european manufacturing industries which include e g aeronautics automotive ict chemical industries pulp and paper industries and different engineering sectors part iii focuses on companies capabilities which are necessary for successful servitization these include strategic management marketing organization innovation engineering human resources controlling quality and networks all the contributions in parts ii and iii add up to a detailed picture of servitization for sectors and functions and indicate the practical implications for enterprises in manufacturing industries the fourth part concludes the book with a chapter summarizing the findings and giving an outlook of servitization in manufacturing industries its challenges and future developments

africa abounds with examples of material and immaterial innovations that were envisaged developed and designed elsewhere yet came to be innovatively and sometimes unexpectedly transformed in africa the authors in this volume explore how external innovations products technologies services institutions and processes have been appropriated in african societies in order to be acceptable and relevant to local conditions expectations and demands written from different disciplinary perspectives the chapters demonstrate the depth and richness of innovation in africa with in some cases surprising outcomes the case studies presented are on subjects as diverse as the wine industry trading stores land reforms washing powder m pesa cassava weddings international borders guest houses urban water supply car technology shallow wells and railways and blacksmithing

this publication shows new information and communications technologies like mobile telephony and the internet have been affecting low income communities and small entrepreneurs in emerging economies

in 2005 dixie dansercoer and troy henkels accepted the challenge to journey from alaska to siberia they would cross unsupported skiing walking swimming and paddling relying solely on their polar experience determination and their passion for ice and snow the moving ice masses of the bering strait are unique polar territory a ghostly and mysterious world of high powered ice movements

along with hundreds of historical photographs a large color profile is included for every vehicle

design occupies an important place in the cultural world of today against this there have been manifold techno legal approaches on the part of the major european legislatures to the issue of the protection of works of design the community proposals for a directive and regulation in this area are a response to the need widely felt in various sectors of the design world for a homogeneous and systematic protection of design works these initiatives should however be considered in the light of the many interests at stake and the various solutions put forward in the wake of the community s past experience in the fields of patents and trademarks
