homo patiens approaches to the patient in the ancient world is a book about the patients of the graeco roman world their role in the ancient medical encounters and their relationship to the health providers and medical practitioners of their time this volume makes a strong claim for the relevance of a patient centred approach to the history of ancient medicine attention to the experience of patients deepens our understanding of ancient societies and their medical markets and enriches our knowledge of the history of ancient cultures it is a first step towards shaping a history of the ancient patient s view which will be of use not only to ancient historians students of medical humanities and historians of medicine but also to any reader interested in medical ethics

the world health organization defines health as a state of complete physical mental and social well being and not merely the absence of disease or infirmity and its constitution also asserts that health for all people is dependent on the fullest co operation of individuals and states the ongoing pandemic has highlighted the power of both healthy and unhealthy information so while healthcare and public health services have depended upon timely and accurate data and continually updated knowledge social media has shown how unhealthy misinformation can be spread and amplified reinforcing existing prejudices conspiracy theories and political biases this book presents the proceedings of medinfo 2021 the 18th world congress of medical and health informatics held as a virtual event from 2 4 october 2021 with pre recorded presentations for all accepted submissions the theme of the conference was one world one health global partnership for digital innovation and submissions were requested under 5 themes information and knowledge management quality safety and outcomes health data science human organizational and social aspects and global health informatics the programme committee received 352 submissions from 41 countries across all imia regions and 147 full papers 60 student papers and 79 posters were accepted for presentation after review and are included in these proceedings providing an overview of current work in the field over a wide range of disciplines the book will be of interest to all those whose work involves some aspect of medical or health informatics

from the 14th until the 19th century the last novella of boccaccio s decameron also known as the griselda story has been translated and adapted countless times in many european languages this story s success can be explained by considering it a myth and analysing how this myth engages with contemporary discourses such as the definition of the ideal wife the querelle des femmes the socio political consequences of social exogamy and

tyranny

during the past decade there has been a considerable expansion in the understanding assessment and treatment of critically ill patients an attempt to portray our present knowledge of this diverse field in a comprehensive textbook is therefore a formidable and daunting undertaking however many colleagues in different disciplines and from different countries convinced us of the need for such a work and greatly encouraged by their interest we embarked upon the project any single text even a very long one cannot cover every aspect of critical illness our first task was therefore to define those areas of the subject that had to be included this we did on a systematic basis and although the final emphasis of the book is very largely directed to clinical matters we felt it pertinent to include in some detail accounts of relevant physiology and technology care of the critically ill patient is divided into twelve sections each concerned with major facets of critical illness each of the sixty eight chapters includes a topical and often extensive bibliography the many chosen contributors form an international group of specialists whose combined expertise embraces the topics that we have selected

this book designed to meet the needs of clinicians and now in an extensively revised second edition clearly explains the rationale and technique for the rehabilitation of fully edentulous patients utilizing traditional graftless concepts as well as zygomatic implant strategies when posterior support cannot be achieved by the former means considerations relevant to treatment planning and the biomechanics of immediate loading and zygomatic implants are first discussed the techniques for placement of traditional tilted and zygomatic implants and for immediate loading of a full arch restoration are then described step by step detailed information and guidance are also provided on the different materials available for full arch restorations laboratory aspects of the definitive restoration maintenance of restorations and management of prosthetic and surgical complications the book concludes with a helpful series of clinical cases graftless solutions for the edentulous patient is designed particularly for clinicians with experience in placing and restoring dental implants
