the battle of mamusa reflects the grievous event in the western transvaal border culture context that contributed profoundly to the dissolution of the last functioning korana polity the narrative presented in this work is exceptional for at least two reasons firstly for the thoughtful manner in which the intriguing concept of metaphors is applied in this study of historical ethnography cum ethnohistory secondly for the skilful way in which the author relates the battle of mamusa to how present day korana and neo khoisan communities in a new context are relating to their future in a post 1994 constitutional dispensation
