americans have seen it all in education over the last twenty years charter schools vouchers private schools ever changing sets of technology increased funding for schools decreased funding for schools accountability measures for teachers and on and on these schemes never seem to make any real changes in student outcomes this is because the obsolete educational system is simply not

compatible with what we now know about how students learn and how teachers are developed and sustained beyond obsolete how to upgrade classroom practice and school structure delves into the history of western civilization shows how a misunderstanding of this history informs our current educational system and then makes a broad argument for a full scale upgrade in teacher practice the software and school structure the hardware if educational reform is to be achieved then superintendents assistant superintendents principals assistant principals etc will have to be declared obsolete education will have to move beyond them into a new era where teachers are the educational leaders in their field and their classroom practice is compatible with learning theory

this book explores the nature of liberal property in the twenty first century it contains three parts the first examines how we have arrived at the liberal concept of property what many scholars call the bundle of rights metaphor of property this part argues that the liberal conception embodied in the bundle of rights metaphor is really a way of masking or hiding what property really is an exercise of ego about the way goods and resources are used or put another way it enshrines the ability to suit personal preferences about the way things are used rather than what might better serve the common good the second part provides an important modern critique of the bundle of rights metaphor that in addition to being a collection of rights property is also about social relations that exist between people through these social relations which are contained in law any decision that a person makes about how to use a good or resource necessarily carries implications for others while those effects can be both positive and negative we are much more familiar with the latter including most of the global challenges we face today climate change extreme weather global hunger and global poverty taking those global challenges as its focus the final part of the book suggests possible futures of property in which it is reconceived in ways that reduce the potential for negative impacts on others
