english scientist naturalist and geologist charles darwin 1809 1882 transformed our understanding of the planet and our place on it with his theory of evolution through natural selection much of the basis for his conceptual breakthrough was his research during the five year journey he undertook on the hms beagle an english exploratory vessel which sailed south america and the south pacific from 1831 to 1836 first published in 1839 under the title journal and remarks this replica volume reproduces the 1845 second edition originally called journal of researches enthralling both as a tale of travel adventure and as a naturalist s diary the voyage of the beagle is even more fascinating for the hints it offers from decades prior to darwin s publication of 1859 s on the origin of species of the observations of the natural world and the thought processes that followed that would combine to revolutionize the field of biology

classic of adventure travel and cornerstone in the development of evolutionary theory recounts darwin s five year sojourn in south america where he made the observations that led to his concept of natural selection basing many of his conclusions upon his study of the unique creatures of the galápagos

charles darwin s account of the momentous voyage which set in motion the current of intellectual events leading to the origin of species when hms beagle sailed out of devonport on 27 december 1831 charles darwin was twenty two and

setting off on the voyage of a lifetime his journal here reprinted in a shortened form shows a naturalist making patient observations concerning geology natural history people places and events volcanoes in the galapagos the gossamer spider of patagonia and the australasian coral reefs all are to be found in these extraordinary writings the insights made here were to set in motion the intellectual currents that led to the theory of evolution and the most controversial book of the victorian age the origin of species this volume reprints charles darwin s journal in a shortened form in their introduction janet brown and michael neve provide a background to darwin s thought and work and this edition also includes notes maps appendices and an essay on scientific geology and the bible by robert fitzroy darwin s friend and captain of the beagle for more than seventy years penguin has been the leading publisher of classic literature in the english speaking world with more than 1 700 titles penguin classics represents a global bookshelf of the best works throughout history and across genres and disciplines readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors as well as up to date translations by award winning translators

darwin s notes from his 1831 trip provide an account of the hms beagle and the first hints of his theory of evolution and natural selection

this volume contains in the form of a journal a history of our voyage and a sketch of those observations in natural history and geology which i think will possess some interest for the general reader i have in this edition largely condensed and corrected some parts and have added a little to others in order to render the volume more fitted for popular reading but i trust that naturalists will remember that they must refer for details to the larger publications which comprise the scientific results of the expedition

voyage of the beagle chronicles charles darwin s five years as a naturalist on board the h m s beagle the notes and observations that he recorded in his diary included chile argentina and galapagos islands and encompasses the ecology geology and anthropology of the places he visits a fascinating travel memoir the ideas that were later to evolve into darwin s theory of natural selection find their naissance in voyage of the beagle
