why are there 7 days in a week and 12 months in a year what do stars have to do with it long ago people looked up at the night sky they made up stories to explain the speckled dots of lights the ancients divided up the year into weeks and days they assigned stars to days and groups of stars to months we may not know all their stories and beliefs but we still tell time the same way inside this book are the reasons why

from ancient times people had knowledge of the zodiac s intimate involvement in the creation of physical life they understood that the twelve realms of constellations of fixed stars in the sky emanated specific forces that were brought to life and movement by the planets these spiritual energies created and formed all living beings on earth including of course the human being this traditional awareness has been reenlivened and given new meaning in our time through rudolf steiner s anthroposophy steiner gave specific indications involving twelve individual gestures and colours that depict the forces of the twelve zodiacal regions in this richly illustrated collation of original artistic research which features exciting new work on the zodiac via the mediums of sculpture graphics and painting these new insights are explored and illumined in twenty seven essays and numerous full colour images led by editor gertraud goodwin the various

contributing artists offer a rich tableau of authentic individual approaches to understanding the zodiac throwing light on the vast realm of creative forces around us whilst acknowledging their primary source from the many relationships to other qualities like the consonants virtues areas of the human body colours eurythmy gestures elements earth water air fire musical keys and many more in which the zodiacal forces express themselves as if through different instruments a harmony begins to emerge which informs me of an ever rounder picture of one particular force of the zodiac

in western astrology we use of course roman names for the planetary symbols but when you look on the mythological explanations you usually get greek mythology to explain them doesn t count nomen est omen searching the mythological rests of the original deities mercury venus mars jupiter and saturnus it was necessary to dive deeply into the history of theology because the well known literates like ovid virgil and lucretius preferred to retell greek myths instead of preserving their own roots in the last centuries until about 1900 these authors were taken as sources for theological research and there was no discrimination between literature poetry and original italic tradition perspective and moral view of the 19th century added more misinterpretations and made the knowledge of roman religion almost vanish existing rests are collected in this book and compared with the actual astrological symbols so the reader can recognize how much of roman ideas can be found in the planetary symbols nowadays simultaneously new points of view are opened for the interpretation of mercury venus mars jupiter and saturn
