the working group ii contribution to the sixth assessment report of the intergovernmental panel on climate change ipcc provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability the report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences it emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind the ipcc is the leading body for assessing climate change science ipcc reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales available as open access on cambridge core

the first soil survey in the philippines was done by mr clarence dorsey an american soil scientist in the province of batangas in 1903 the soils of the philippines however is the first comprehensive summary of more than a century of soil survey work in this country it integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day the result is the first ever genetic key for classifying philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to

confidently produce their own soil map at a more detailed map scale to suit the project requirements this book brings together discussions on soils and soil mapping units and up to date international techniques and technologies it makes soils relevant to current political realities and national issues as soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment the soils of the philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come with a vanishing breed of experienced soil surveyors not only in the philippines but also worldwide it may remain the only book on philippine soils for the next hundred years or more since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world as the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the philippines for example the guadalupe series underlying the skyscrapers of makati city are becoming extinct as a result of urban development therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover

describes u s exporters and the products they export the primary company listing is geographic by state while products are listed by harmonized commodity codes there are also alphabetical company and product indexes
