during the second world war there was concern as to whether britain unable to import food from abroad would be able to feed the population therefore the national farm survey was conducted during 1941 43 and described every farm in england and wales in great detail because of its sensitivity this material only became publicly available in 1992 after a 50 year closure period information on farming types cropping and stocking machinery employment farm size and structure land ownership and farm buildings was provided for all farms which were larger than 5 acres at that time this book gives an overview of the survey and provides the most complete doomsday of british agriculture available including maps and illustrations of the areas surveyed at that time it is a unique source for measuring post war changes in agriculture environment and society

originally published in 1959 this post war study of farm rents marshals the evidence from a nation wide survey not since the national farm survey of 1941 3 had similar information about the national average level of farm rents been available

in certain details and aspects of its scope this study was unique what was analysed tabulated and commented upon was of vital importance to the farming and landowning communities of immediate relevance to professional practice and original in its contribution to academic knowledge attention was focussed on the farm rents of england and wales over the post war period but comparison with war time and pre war farm rents in scotland was possible

the countryside planning and change 1981 examines the relationship between policies and their actual effects on the countryside throwing light on the problems inherent in a fragmented approach to policy making it looks at the underlying reasons for change in the rural environment first and then the governmental response as reflected in powers assumed and rights granted to guide and direct rural development the way in which land use changes have been affected by public policies is then examined in further detail with particular attention to settlements detailed case studies are utilised for this purpose

consists of invited papers from internationally recognized researchers chosen for their quality as well as their overall unity describes current methods along with innovative research and presents new technologies for solving problems unique to establishment surveys stages of the survey process are addressed in the first five parts with cross cutting topics in the last section

provides guidance on improving coverage in sample surveys and documents coverage errors in federal surveys

this book is an exciting reappraisal of the role and practice of biodiversity monitoring showing how new technologies and software applications are rapidly maturing and can both complement and maintain continuity with the best

practice in traditional field skills environmental monitoring is a key component in a large number of national programmes and constitutes an important aspect of understanding environmental change and supporting policy development taking an interdisciplinary approach monitoring biodiversity begins by discussing monitoring as an established field and examines the various budgetary and technological challenges it examines different methodologies the variation between countries and the design features relevant to understanding monitoring systems created for new policy goals or different funding situations the huge variety of methods revealed across 18 chapters which vary from statistical designs to remote sensing interviews surveys and new ways of stacking and combining data and thematic information for visualization and modelling underlines just how mature and multifaceted the modern practice of monitoring can be it concludes with several problem based chapters that discuss the design and implementation of environmental monitoring in specific scenarios such as urban and aquatic areas all chapters include key messages study questions and further reading with a focus on europe but with international relevance monitoring biodiversity will be an essential resource for students at all levels of environmental monitoring assessment and management

the flexible multi partner mechanism fmm as fao s main pooled multi partner flexible funding instrument enables resource partners to contribute voluntary and less earmarked financial resources to support the delivery of programmatic results under fao s strategic framework this report highlights the key achievements of the fmm in 2020 both in terms of its accomplishments as a funding mechanism and the delivery of transformative results on the ground through fmm funded programmes and subprogrammes

the routledge companion to spatial history explores the full range of ways in which gis can be used to study the past considering key questions such as what types of new knowledge can be developed solely as a consequence of using gis

and how effective gis can be for different types of research global in scope and covering a broad range of subjects the chapters in this volume discuss ways of turning sources into a gis database methods of analysing these databases methods of visualising the results of the analyses and approaches to interpreting analyses and visualisations chapter authors draw from a diverse collection of case studies from around the world covering topics from state power in imperial china to the urban property market in nineteenth century rio de janeiro health and society in twentieth century britain and the demographic impact of the second battle of ypres in 1915 critically evaluating both the strengths and limitations of gis and illustrated with over two hundred maps and figures this volume is an essential resource for all students and scholars interested in the use of gis and spatial analysis as a method of historical research
