the friedman lucas transition in macroeconomics a structuralist approach considers how and to what extent monetarist and new classical theories of the business cycle can be regarded as approximately true descriptions of a cycle s causal structure or whether they can be no more than useful predictive instruments this book will be of interest to upper division undergraduates graduate students researchers and professionals concerned with practical theoretical and historical aspects of macroeconomics and business cycle modeling

spurred by the success of the first stress test of us banks toward the end of the global economic crisis in 2009 stress testing of large financial institutions has become the cornerstone of banking supervision worldwide the aim of the tests is to determine which banks are adequately capitalized under severe economic shocks and to order corrective measures for those that are vulnerable in banking s final exam one of the world s leading experts on banking regulation concludes that the tests administered on both sides of the atlantic suffer from fundamental weaknesses leading to a false sense

of reassurance about the safety and soundness of the banking system some weaknesses can be corrected within the existing bank capital regime but others will require bold reforms including higher minimum capital requirements for the largest and most systemically important banks the banking industry is likely to resist these reforms but this book explains why their objections do not hold water

this edited volume explores investigates and analyses free learning an innovative approach to student directed learning which seeks to challenge educational norms from within the volume is framed by a recognition of the urgent need for transformation of our educational systems in traditional education students work through a teacher

directed linear syllabus at a pace dictated by the teacher with summative assessment hurdles at too frequent intervals progression and direction are determined solely by the teacher in free learning students determine their own learning pathway through a non linear syllabus which can be visualised as a mind map students may then complete as many units as they either have time for or are interested in moving from one unit to another on the basis of having formatively satisfied the demands of each individual unit this volume showcases the value and potential of free learning in contemporary practice and is intended to bridge theory and practice the structure of the book reflects this complementary fit with contributions from practitioners describing free learning as a learning and teaching tool in a range of educational settings subjects and age ranges it also contains qualitative and quantitative analyses by researchers exploring the uptake of free learning and students responses to the methodology researchers and educators who are interested in student directed methodologies especially in asia will find that the practical accounts and analyses of free learning contained within provide much food for thought with regard to redefining student learning
