this study focuses on how russian history textbooks published between 1992 and 2021 dealt with the topic of the soviet period 1917 1991 representations of this part of russia s past in school manuals have provoked vivid debates and bolstered government intervention in the field while a gradual shift towards a less critical narrative of the ussr in more recent textbooks is often presented as directed by vladimir putin this study combines research into these texts and inquiry into those who write publish approve or criticize them bringing together these perspectives provides a more complex view of school textbooks as final products of both top down and bottom up processes this volume is aimed at postgraduates researchers and academics specializing in soviet history contemporary russian politics and society and history education and textbooks

this collection brings together published papers on key themes which book historians have identified as of particular significance in the history of twentieth century publishing it reprints some of the best comparative perspectives and most insightful and innovatively presented scholarship on publishing and book history from such figures as philip altbach lewis coser james curran elizabeth long laura miller angus phillips janice radway jonathan rose shafquat towheed catherine turner jay satterfield clare squires eva hemmungs wirtén it is arranged into six sections which examine the internationalisation of publishing businesses changing notions of authorship innovation in the design and marketing of books the specific effects of globalisation on creative property and the book in a multimedia marketplace twentieth century book history attracts an audience beyond the traditional disciplines of librarianship bibliography history and literary studies it will appeal to publishing educators editors publishers booksellers as well as academics with an interest in media and popular culture

what is history teaching now is a research informed handbook designed to provide practical guidance for history teachers and educators with differing levels of experience drawing upon the classroom practice and experience of a range of practitioners the book focuses upon key areas such as curriculum and assessment pedagogy communicating history and resources that support effective teaching and learning this book also provides practical ways to approach teaching topics such as diverse histories the british empire world history and environmental history practical strategies are woven within the book alongside questions for reflection and suggestions for further research and reading

our collected work contains mathematics education research papers comparative studies of school textbooks cover content selection compilation style representation method design of examples and exercises mathematics investigation the use of information technology and composite difficulty level to name a few other papers included are about representation of basic mathematical thought in school textbooks a study on the compilation features of elementary school textbooks and a survey of the effect of using new elementary school textbooks

in trying biology adam r shapiro convincingly dispels many conventional assumptions about the 1925 scopes monkey trial most view it as an event driven primarily by a conflict between science and religion countering this shapiro shows the importance of timing the scopes trial occurred at a crucial moment in the history of biology textbook publishing education reform in tennessee and progressive school reform across the country he places the trial in this broad context alongside american protestant antievolution sentiment and in doing so sheds new light on the trial and the historical relationship of science and religion in america for the first time we see how religious objections to evolution became a prevailing concern to the american textbook industry even before the scopes trial began shapiro

explores both the development of biology textbooks leading up to the trial and the ways in which the textbook industry created new books and presented them as responses to the trial today the controversy continues over textbook warning labels making shapiro's study particularly as it plays out in one of america's most famous trials an original contribution to a timely discussion

controversial books in k-12 classrooms and libraries challenged, censored and banned analyzes the history of controversy surrounding assigned reading in k-12 classrooms and books available in school libraries randy bobbitt outlines the history of book banning and controversy in the united states stemming from 1950s conservative cold war values of patriotism and respect for authority and ramping up through the 1960s and onward as media coverage and parental intervention into the inner workings of schools increased the author claims that sensitive topics including sexuality suicide and drug use do not automatically imply the glorification of deviant behavior but can be used constructively to educate students about the reality of life bobbitt argues that in an effort to shield children from the dangers of controversial issues parents and administrators are depriving them of the ability to discover and debate values that are inconsistent with their own and those around them teaching instead that avoidance of different viewpoints is the solution scholars of education communication literature and policy will find this book especially useful

it is surprising that there is so little research on textbooks given their centrality to teaching and learning in elementary and secondary schools textbooks have become a focus of political and cultural controversy advocating a multicultural curriculum that has sparked some vigorous protests research is absent in this debate therefore questions of legitimate knowledge the role of textbooks textbook design policy selection issues and economic issues concerning the marketplace are not part of the current debate without insights of research on considerate text mentioning illustrations and so forth the current controversy will result in publishers responding to demands for more

content not less thus textbooks will become compendia of information that on the surface satisfy everyone this volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools and thus inform policymakers publishers and those involved in textbook selection representing pure and applied approaches researchers present papers on the quality of writing the role of questions the role of pictures and illustrations and the role of auxiliary materials in the design of effective textbooks the chapters provide insight into research and its application to textbook design and improvement stimulating others to follow this lead

written to promote the development of students critical thinking and analytical abilities through the analysis of theory and evidence concerning sexuality this book covers topics typically covered in human sexuality courses anatomy physiology gender love and relationships development reproductive issues disorders but from a psychological perspective
