like its predecessors volume iii of the handbook for teaching introductory psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom it contains an organized collection of articles from teaching of psychology top the official journal of the society for the teaching of psychology division 2 of the american psychological association volume iii contains 89 articles from top that have not been included in other volumes another distinction between this volume and its predecessors is its emphasis on testing and assessment the book is divided into two sections section one issues and approaches in teaching introductory psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty section two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline this section is organized so as to parallel the order of topics found in most introductory psychology textbooks intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties

of the book go directly to the society for the teaching of psychology to promote its activities to further improve the teaching of psychology

the field of artificial intelligence in education includes research and researchers from many areas of technology and social science this study aims to open opportunities for the cross fertilization of information and ideas from researchers in the many fields that make up this interdisciplinary research area

building intelligent agents is unique in its comprehensive coverage of the subject the first part of the book presents an original theory for building intelligent agents and a methodology and tool that implement the theory the second part of the book presents complex and detailed case studies of building different types of agents an educational assessment agent a statistical analysis assessment and support agent an engineering design assistant and a virtual military commander also featured in this book is disciple a toolkit for building interactive agents which function in much the same way as a human apprentice disciple based agents can reason both with incomplete information but also with information that is potentially incorrect this approach in which the agent learns its behavior from its teacher integrates many machine learning and knowledge acquisition techniques taking advantage of their complementary strengths to compensate for each others weakness as a consequence it significantly reduces or even eliminates the involvement of a knowledge engineer in the process of building an intelligent agent

this proceedings book captures a wide range of timely themes for readers to be able to foresee the digital era s impact on english teaching in non english speaking countries english used in the global environment the frequent mobile communication and the use of ai based translators are bringing about dramatic changes in our english language learning and teaching who can provide us the wisdom to know what to do those scholars going through these complex environmental changes a collection of puzzle pieces may bring us a better contour for the future than a perfectly edited book it s indeed a pleasure reading these insightful pieces to gain wisdom for the future of elt practices in global contexts
