can aural training in music enhance your sound discrimination abilities for languages the study sets off to answer this question by testing 50 german speaking students of non linguistic degrees for their abilities to discriminate between sounds in finnish a language previously entirely unknown to them 25 randomly selected subjects then went through an aural training in music for two weeks

before all the subjects were retested in their aural perceptive abilities in the finnish language by means of a similar test containing different test items the hypothesised positive effect of the musical intervention could be partially proved by a statistically significant mean enhancement in the final scores achieved by the trained group compared to an insignificant enhancement achieved by the control group
