this book is designed for under graduate students of all branches those who are going to study electrical and mechanical technology as one of the subject in their curriculum the primary goal

of this book is to establish a firm understanding of basic knowledge on dc machines single phase transformers three phase induction motors alternators measuring instruments energy sources internal combustion engines heat transfer power transmission and manufacturing methods the contents of this book are presented in a simple way for easy understanding and can be used as self study material

this book is designed based on revised syllabus of jntu hyderabad aicte model curriculum for under graduate b tech be students of all branches those who study basic electrical engineering as one of the subject in their curriculum the primary goal of this book is to establish a firm understanding of the basic laws of electric circuits network theorems resonance three phase circuits transformers electrical machines and electrical installation

this book introduces a variety of advanced machine learning approaches covering the areas of neural networks fuzzy logic and hybrid intelligent systems for the determination and diagnosis of cancer moreover the tactical solutions of machine learning have proved its vast range of significance and provided novel solutions in the medical field for the diagnosis of disease this book also explores the distinct deep learning approaches that are capable of yielding more accurate outcomes for the diagnosis of cancer in addition to providing an overview of the emerging machine and deep learning approaches it also enlightens an insight on how to evaluate the efficiency and appropriateness of such techniques and analysis of cancer data used in the cancer diagnosis therefore this book focuses on the recent advancements in the machine learning and deep learning approaches used in the diagnosis of different types of cancer along with their research challenges and future directions for the targeted audience including scientists experts ph d students postdocs and anyone interested in the subjects discussed

with distributed generation interconnection power flow becoming bidirectional culminating in network problems smart grids aid in electricity generation transmission substations distribution and consumption to achieve a system that is clean safe protected secure reliable efficient and sustainable this book illustrates fault analysis fuses circuit breakers instrument transformers relay technology transmission lines protection setting using digsilent power factory intended audience is senior undergraduate and graduate students and researchers in power systems transmission and distribution protection system broadly under electrical engineering

violence on both large and small scales has a tremendous impact on society the causes and

impacts of violence have been under study for decades however in the modern era it is important to remain knowledgeable of the current research on violence as tragic events flood news headlines around the world it is essential to evaluate violence its causes and its impact on society in order to mitigate and prevent violence globally the research anthology on modern violence and its impact on society discusses the causes ideologies and perceptions of modern violence and examines its impact on society it presents emerging research on modern violence in multiple dimensions from interpersonal to mass violence covering topics such as gun violence radicalization and victim offender overlap this major reference work is an essential resource for sociologists politicians government officials law enforcement community leaders educators and administrators of both k 12 and higher education students of higher education psychologists criminologists victimologists researchers and academicians

ice houses energy architecture and sustainability presents new and novel technologies and approaches surrounding daily and seasonal ice storage along with discussions on passive cooling and natural technologies using different methods including heat pumps the book covers different aspects of ice houses and cold energy production storage and utilization by addressing various issues connected to the technology and structure of traditional ice houses and natural and artificial ice making this references looks at new technological approaches for the reduction of electrical energy consumption in buildings users will find this to be a comprehensive overview of ice house storage that includes worked examples and global case studies it is an essential resource for researchers and engineers looking to advance their understanding of this method of thermal storage includes worked examples which calculate and determine the amounts of different parameters to help better understand the problem solving process provides a comprehensive literature review on the history and architecture of ice houses along with different ice production and storage methods contains recent developments related to cold energy production and storage through ice making to reduce electricity demand
