this book both introduces the philosophy of science through examination of the occult and examines the occult rigorously enough to raise central issues in the philosophy of science placed in the context of the occult philosophy of science issues become immediately understandable and forcefully compelling divergent views on astrology parapsychology and quantum mechanics mysticism emphasize topics standard to the philosophy of science such issues as confirmation and selection for testing causality and time explanation and the nature of scientific laws the status of theoretical entities the problem of demarcation theory and observation and science and values are discussed significantly revised this second edition presents an

entirely new section of quantum mechanics and mysticism including instructions from n david mermin for constructing a device which dramatically illustrates the genuinely puzzling phenomena of quantum mechanics a more complete and current review of research on astrology has been included in this new edition and the section on the problem of demarcation has been broadened

eleven distinguished historians of science explore natural philosophy and mathematics in the middle ages

the first half of religion and the natural sciences is an introduction to the discussion of science and religion here the reader learns why there is any debate at all and what resources exist for responding to it the second half deals with specific issues that arise in the individual sciences from astronomy and physics to biology and ecology any project hoping to connect science and religion must supply the categories of connection which are found primarily although not exclusively in philosophy the simplicity of the arrangement and the nature of the selections are intended to make religion and the natural sciences available to as wide an audience as possible including students from the sciences and technology the professions the humanities and liberal studies and theology

many friends colleagues and research staff members have directly and indirectly contributed to this book it is impossible to acknowledge the contribution of each still we would like to recognize several persons as well as institutions that have been particularly helpful research funds were provided by the kentucky agricultural experiment station and by the ford foundation john myers of the current research information system provided us with a computer tape listing current projects carolyn sachs was extremely helpful in coordinating the mail survey of scientists christian ritter lisa slatin and bobbie sparks assisted in coding the data ann stockham developed the index and also organized the data janet baynham sue lewis and greg taylor aided in the voluminous computer programming and statistical analysis rosemary cheek typed most of the manuscript marlene pettit michael claycomb deborah wheeler and penny hogue also assisted in the typing janice taylor aided in the manuscript typing and ran interference on much of the administrative detail

this book is an intellectual journey into epistemology pedagogy physics architecture medicine and metallurgy the focus is on various dimensions of african indigenous knowledge aik with an emphasis on the sciences an area that has been neglected in aik discourse the authors provide diverse views and perspectives on african indigenous scientific and technological knowledge that can benefit a wide spectrum of academics scholars students development agents and policy makers in both governmental and non governmental organizations and enable critical and alternative analyses and possibilities for understanding science and technology in an african historical and contemporary context

air pumps electrical machines colliding ivory balls coloured sparks mechanical planetariums magic mirrors hot air balloons these are just a sample of the devices displayed in public demonstrations of science in the eighteenth century public and private demonstrations of natural philosophy in europe then differed vastly from today s unadorned and anonymous laboratory experiments science was cultivated for a variety of purposes in many different places scientific instruments were built and used for investigative and didactic experiments as well as for entertainment and popular shows between the culture of curiosities which characterized the seventeenth century and the distinction between academic and popular science that gradually emerged in the nineteenth the eighteenth century was a period when scientific activities took place in a variety of sites ranging from academies and learned societies to salons and popular fairs shops and streets this collection of case studies describing public demonstrations in britain germany italy and france exemplifies the wide variety of settings for scientific activities in the european enlightenment filled with sparks and smells the essays raise broader issues about the ways in which modern science established its legitimacy and social acceptability they point to two major features of the cultures of science in the eighteenth century entertainment and utility experimental demonstrations were attended by apothecaries and craftsmen for vocational purposes at the same time they had to fit in with the taste of both polite society and market culture public demonstrations were a favourite entertainment for ladies and gentlemen and a profitable activity for instrument makers and booksellers

indigenous science and technology focuses on how nahuas have explored understood and explained the world around them in pre invasion colonial and contemporary time periods

history and philosophy of science and technology is a component of encyclopedia of physical sciences engineering and technology resources in the global encyclopedia of life support systems colss which is an integrated compendium of twenty one encyclopedias the theme on history and philosophy of science and technology in four volumes covers several topics such as introduction to the philosophy of science the nature and structure of scientific theories natural science a short history of molecular biology the structure of the darwinian argument in the origin of species history of measurement theory episodes of xx century cosmology a historical approach philosophy of economics social sciences historical and philosophical overview of methods and goals introduction to ethics of science and technology the ethics of science and technology the control of nature and the origins of the dichotomy between fact and value science and empires the geo epistemic location of knowledge science and religion scientific knowledge and religious knowledge significant epistemological reference points thing called philosophy of technology transitions from function oriented to effect oriented technologies some thought on the nature of modern technology technical agency and sources of technological pessimism these four volumes are aimed at a broad spectrum of audiences university and college students educators and research personnel

this volume collects the papers presented at a conference on science pseudo science and society sponsored by the calgary institute for the humanities and held at the university of calgary may 10 12 1979 more than many such collections this one preserves some trace of the intellectual excitement which surrounded this gathering of scholars a primary inspiration for the symposium on science pseudoscience and society was a growing awareness of the crucial role the study of pseudo science plays in the areas of contemporary scholarship which are concerned with the nature of science and its relationship to broader social issues this volume is organized around three major questions concerning the relationships among science pseudo science and society the papers in the first section address the question of whether it is possible to draw a sharp demarcation between science and pseudo science and what the criteria of that demarcation might be the papers in the second section recognizing the historical importance of various of the pseudo sciences consider their impact positive or negative on the development of the sciences themselves the papers in the third section deal with the question of the relationship between the sciences and pseudo sciences on the one hand and social factors on the other
