one of the most striking changes contained in the maastricht treaty was the establishment of a de jure citizenship of the union for the first time since the roman empire peoples of eastern western northern and southern europe share a common legal citizenship status the significance of this development is potentially profound yet it is one of the least discussed aspects of the maastricht treaty in this book stephen hall examines the legal implications of establishing a european citizenship he shows that community law has never given unqualified effect to the member states dispositions of their nationalities and that the member states have had their sovereign power to confer and withdraw their nationalities qualified by the maastricht treaty the book goes on to discuss the implications of union citizenship on community migration rights demonstrating that the new non economic migration rights for union citizens are directly effective but that they are subject to a range of important limitations and conditions among these conditions is a residual constitutional power contingently

retained by the member states to derogate from community rights on the grounds of national or public security

in the early decades of european integration the enforcement of eu competition law was highly centralised virtually all enforcement actions under articles 101 and 102 tfeu were initiated by the european commission more recently the enforcement of eu competition law has become less centralised many would say even decentralised in 2004 essentially in an effort to increase enforcement capacity in the wake of eu enlargement the involvement of member state competition authorities was significantly reinforced by national authorities being given power to pursue infringements of eu competition law largely on the basis of their domestic enforcement regimes this combination of decentralisation and enforcement autonomy raises questions about the relationship between eu law and national law as well as about the costs of enforcement this new book links these questions by analysing how competences in the area of sanctions are distributed between eu and national law and how this influences the costs of enforcement the author s conclusions which highlight the economic implications of the choices made by competition authorities courts and legislators will be of use to all the above in further developing eu competition policy the phd thesis on which this book is based was declared runner up in the 2013 concurrences awards
