the growth of princely states in early renaissance italy brought a thorough renewal to the old seats of power one of the most conspicuous outcomes of this process was the building or rebuilding of new court palaces erected as prestigious residences in accord with the new classical principles of renaissance architecture the novelties however went far beyond architectural forms they involved the reorganisation of courtly interiors and their functions new uses for the buildings and the relationship between the palaces and their surroundings the whole urban setting was affected by these processes and therefore the social residential and political customs of its inhabitants this is the focus of a renaissance architecture of power which aims to analyse from a comparative perspective the evolution of italian court palaces in the renaissance in their entirety contributors are silvia beltramo flavia cantatore bianca de divitiis emanuela ferretti marco folin giulio girondi andrea longhi marco rosario nobile aurora scotti elena svalduz and stefano zaggia

I analisi condotta nel presente saggio di tipo essenzialmente semasiologico ha cercato di porre in evidenza come il testo vada ad inserirsi all'interno di un più generale interesse verso le vicende degli ugonotti francesi questi ultimi considerati rappresentativi ante litteram di quegli ideali di uguaglianza e di libertà che poi sarebbero stati anche il motore di certa parte democratica dell'intellettualità risorgimentale italiana quella dei democratici che dovettero soccombere di fronte

alle istanze moderate di tipo cavouriano fu una fazione sicuramente perdente ma di certo non priva di spessore culturale e di impatto sociale almeno a giudicare dalla pletora di drammi e di tragedie che seppe produrre a testimonianza dei propri ideali tale analisi preceduta dalla disamina di alcuni drammi che presentarono al pubblico tematiche simili per tentare di individuare una radice comune a cui anche l'ultimo autore esaminato Gaetano Gattinelli avrebbe poi fatto riferimento

This book gathers and makes available in English with new introductions previously out of print or otherwise difficult to access articles by Fr Roberto Busa. Since 1913, 2011 also included is a comprehensive bibliography of Busa, an oral history interview with Busa's translator and a substantial new chapter that evaluates Busa's contributions and intellectual legacies. The result is a groundbreaking book that is of interest to digital humanists and computational linguists as well as historians of science, technology and the humanities as the application of computing to cultural heritage becomes ever more ubiquitous. New possibilities for transmitting, shaping, understanding, questioning and even imagining the human record are opening up. Busa is considered by many to be among the pioneers in this field and his research on projects like the *Index Thomisticus* is one of the earliest known examples of a humanities project that incorporated automation. It continues to be widely cited and used today. Busa published more than 350 academic articles and shorter pieces in numerous languages but despite the unquestionable importance of his early work for understanding the history and development of fields like humanities computing and computational linguistics, a large part of his canon and thinking remained inaccessible or difficult to access until this book.

Connecting to issues in the humanities today, this book shows how the Italian Renaissance influenced and changed early modern Europe.
