this edition of bouncebacks emergency medicine books examines the bounceback visit
 putting the reader in the footsteps of the clinician as the patient deteriorates the story
 pauses at important decision points as possible management strategies are reviewed in
 a literature based fashion followed by a revelation of the path chosen by the actual
 provider as the patient s course progresses we reach additional decision points and
 address further clinical questions in addition to our chapter authors many with
 expertise in critical care emergency medicine we have an all star lineup of expert
 whisperers first an em critical care section editor below and second emcrit org s
 double boarded critical care guru scott weingart their comments are inserted in grey
 boxes and are intended to give tips and tricks borne of experience and to provide
 context to the literature as if they are standing over our shoulder and advising during
 a resuscitation additionally there are three chapters where we address the medical
 legal aspects of care enter greg henry md past president of the american college of
 emergency physicians acep and one of the most experienced physician medical legal
 experts in the country he opines on the approach that both the defense and plaintiff

would likely pursue and by extension how we can make patients safer through our evaluation and documentation before there is an adverse outcome whereas these chapters contain the actual documentation from the ed chart a very few chapters have slight modifications to the final aspects of the return visit at decision point 3 to allow for exploration of different critical care scenarios there is still plenty of commentary on the documentation missed red flags and what could have been done to improve care at the initial visit our goal is to make each chapter challenging dynamic and realistic to move us from standard of care to excellence in care book review it's back it's bouncebacks one of the mostly widely read and highly regarded education series in all of emergency medicine clinicians fear the medical malpractice landscape but mike weinstock and the team give you all the tools you need to protect yourselves documentation people documentation now with a critical care version read this book sleep better at night as simple as that love love this series mel herbert md mbbs bmedsci faaem professor of emergency medicine at the keck school of medicine lac usc medical center owner and editor of em rap

assessment of educational achievement whether by traditional examinations or by teachers in schools attracts considerable public interest particularly when it is associated with high stakes outcomes such as university entry or selection for employment when the individual s results do not chime with their or their teachers expectations doubts creep in about the process of assessment that has arrived at this result however educational assessment is made up of many layers of complexity which are not always clear to the general public including teachers students and parents and which are not

easily understood outside of the expert assessment community these layers may be organized in highly co dependent relationships that include reliability validity human judgment and errors and the uses and interpretations of the various types of assessment no one could reasonably argue that the principles and complexities of educational assessment should be core learning in public education but there is a growing realization that trust in the uk assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year this book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment and how this understanding may be improved this book was originally published as a special issue of the oxford review of education
