three decades ago urban america was troubled by escalating crime rates and a fleeing middle class but conditions in many cities were enviable then compared to now some are so damaged that to restore them to their 1970 condition seems an insurmountable task and true revitalization may seem unimaginable to those who control their fate yet all is not lost cities in full explores the great potential of the american city and outlines essential elements necessary for its revitalization steve belmont embraces jane jacob's much acclaimed prescription for urban vitality high densities mixed land uses small blocks and variously aged buildings this book examines neighborhoods that adhere to precepts and those that do not and compares the results he examines the destructive forces of decentralization and shows how and why they must be turned into forces of renewal the author outlines an agenda for recentralizing commerce housing and transportation infrastructure and discusses how recentralization is affected by poor social and economic conditions the author analyzes the deficiencies of current low income housing policy and offers a strategy more favorable to cities and their metropolitan areas belmont exposes neighborhood political forces that sometimes thwart a city's best interests and offers an ambitious blueprint for renewal that includes creating middle and upper income housing at moderate and high densities revitalizing neighborhood commercial streets with an urban spirit building new centralized infrastructure and transforming the public realm to attract the middle class exhaustively researched and well illustrated this book is an invaluable resource for planners dedicated to reviving american cities

what is a rubric and how are they being used in teacher education and evaluation when did rubrics become ubiquitous in the field of education what impact do rubrics have on students teachers teacher educators and the educational enterprise this book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country although there is a wealth of literature about how to make rubrics there is scant literature that

explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education the chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool this book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature

this book explains why the earliest cities had grid form street systems what conditions led to their being overwhelmingly preferred for 5000 years throughout the world why the founding fathers wanted gridform cities and how they affect economic transactions real property has been instrumental in forming urban settlements for 5000 years but virtually all urban form commentary theory and research has ignored this reality the result is an incomplete and flawed understanding of cities real property became a means of arranging spatial patterns caused by millennia of human evolutionary and historical developments with respect to access and movement as a result access to resources of all types became a regulatory mechanism controlled at least in part by real property ownership the effects of real property on urban spatial patterns are currently best seen by examining american urban space which has changed significantly over the past 200 years this change which began in the 1840s and established path dependence through a combination of design thought sentimental pastoralism and financial prowess resulted in an urban regime shift that diminished economic resilience this book offers a rethinking of how real property relates to real space examines the thought of form promoters links space property neurological evolution and settlement form shows access is measurable and describes the plusses and minuses of functionalism rent seeking general purpose technology grid form street systems and what the american founding fathers thought about urban form

for decades landscape architecture was driven solely by artistic sensibilities but in these times of global change the opportunity to reshape the world comes with a responsibility to consider how it can be resilient fostering health and vitality for humans and nature landscape architecture theory re examines the fundamentals of the field offering a new approach to landscape design drawing on his extensive career in teaching and practice michael murphy begins with an examination of influences on landscape architecture social context contemporary values and the practicalities of working as a professional landscape architect he then delves into systems and procedural theory while making connections to ecosystem factors human factors utility aesthetics and the design process he concludes by showing how a strong theoretical understanding can be applied to practical every day decision making and design work to create more holistic sustainable and creative landscapes students will

take away a foundational understanding of the underpinnings of landscape architecture theory as well as how it can be applied to real world designs working professionals will find stimulating insights to infuse their projects with a greater sense of purpose

this book articulates a unique conception of aesthetic educational philosophy and its relation to the chinese world drawing on the works of the prominent contemporary chinese philosopher zehou li the book outlines an aesthetics approach to educational maturity that recognises both the contributions of western enlightenment ideals and chinese traditions paving the way for an inclusive and post comparative philosophy it offers a nuanced discussion of zehou li s thought and how his work can be framed at the border between traditional and modern china between china and the west the book combines a discussion of aesthetics with educational theory and considers their combined implications for educational practice in particular in the first person perspectives of students parents and teachers in both local and global contexts providing a way of doing philosophy of education that carefully considers interactions and overlaps between western and chinese civilisation the book will be of great interest to researchers academics and postgraduate students in the fields of educational philosophy educational theory and chinese and cross cultural philosophy

this new book is by two knowledgeable and expert popularizers of chemistry and deals exclusively with molecules and compounds rather than with the simpler atoms and elements it is based on the very successful molecule of the month website that was begun by paul may fifteen years ago and to which his co author simon cotton has been a frequent contributor the authors strike an excellent balance between introducing the novice to the world of molecules while also keeping the expert chemist interested i highly recommend this book to all readers it will vastly expand your knowledge and horizons of chemistry and the human ingenuity that surrounds it from the foreword by dr eric scerri ucla los angeles website ericscerri com author of the periodic table its story and its significance and several other books on the elements and the periodic table the world is composed of molecules some are synthetic while many others are products of nature molecules that amaze us presents the stories behind many of the most famous and infamous molecules that make up our modern world examples include the molecule responsible for the spicy heat in chilies capsaicin the world s first synthetic painkiller aspirin the pigment responsible for the color of autumn leaves carotene the explosive in dynamite nitroglycerine the antimalarial drug quinine the drug known as speed methamphetamine and many others other molecules discussed include caffeine adrenaline cholesterol cocaine digitalis dopamine glucose insulin methane nicotine oxytocin penicillin carbon dioxide limonene and testosterone in all the book includes 67 sections each describing a different molecule what it does how it is made and why it is so interesting written by experts in the field the book is accessible and easy to read it includes amusing anecdotes historical curiosities and entertaining facts about each molecule thereby balancing educational content with entertainment the book is heavily illustrated with

relevant photographs images and cartoons the aim being both to educate and entertain
