this volume addresses the key issue of the initial education and lifelong
professional learning of teachers of mathematics to enable them to realize the
affordances of educational technology for mathematics with invited contributions
from leading scholars in the field this volume contains a blend of research articles

and descriptive texts in the opening chapter John Mason invites the reader to engage in a number of mathematics tasks that highlight important features of technology mediated mathematical activity. This is followed by three main sections: an overview of current practices in teachers' use of digital technologies in the classroom and explorations of the possibilities for developing more effective practices drawing on a range of research perspectives including grounded theory, enactivism and Valsiner's zone theory. A set of chapters that share many common constructs such as instrumental orchestration, instrumental distance and double instrumental genesis and research settings that have emerged from the French research community but have also been taken up by other colleagues. Meta-level considerations of research in the domain by contrasting different approaches and proposing connecting or uniting elements.

Focus revision where learners need most support and ensure coverage of the Cambridge Primary Mathematics Curriculum Framework with easy-to-follow teaching notes, assess knowledge and progress with structured practice tests and whole class activities, improve understanding and technique with photocopiable resources such as model texts, practice questions and games, introduce strategies for supporting recall and revision with further ideas to stretch learners and marking guidance. This resource has not been through the Cambridge International endorsement process.

What is effective mathematics teaching? This book represents the first purposeful cross-cultural collection of studies to answer this question from teachers' perspectives. It focuses particularly on how teachers view effective teaching of mathematics; teachers' voices are heard and celebrated throughout the studies reported in this volume. These studies are drawn from many parts of the world representing both eastern and western cultural traditions. The editors and authors have deliberately included the views of teachers and educators from different cultural backgrounds, taking into account that beliefs on effective mathematics teaching and its features are highly influenced by one's own culture. The book will provide readers and scholars with the stimulus to take the ideas presented and expand on them in ways that help improve mathematics education for children. Teachers and researchers in both the east and the west.

drawing on wide ranging research this book originally published in 1997 explores how the policy changes of previous years were affecting primary teachers and their work at the time within the context of worldwide restructuring the thoughts feelings and activities of teachers in their daily work are examined the core argument is that what used to be a complex but fulfilling job distinguished by professional dilemmas which are amenable to professional skill had become increasingly marked by tension and constraint which frustrates teacher creativity while some teachers found new opportunities in the new primary school many used strategical and micro political activity in order to cope while others fell victim to stress and burnout the authors argue that teachers own active involvement in policy change is required if their creative potential is to be realized the book will still be of interest to teachers in primary schools researchers and policy makers

compares the number of hours the percentage of school time spent on core academic subjects during the elementary school week in the u s it addresses three central issues first the actual number of hours the percentage of school time the nation s elementary school teachers spend on instruction in the core subject areas of english reading language arts math social studies science second analyzes how this time varies by characteristics of the local community school teacher classroom students finally examines how the amount percentage of time spent on the core subjects has changed from 1987 88 to 1993 94 charts tables

the need for ongoing teacher development has been a recurring theme in the field of tesol in recent years not everything a language teacher needs to know can be provided at the pre service level and the knowledge base of teaching is constantly changing based on cutting edge research illustrated through case studies this book outlines strategies for professional development through reflective practice in the language classroom accessible and comprehensive the book presupposes no prior knowledge of linguistics or language teaching and each chapter includes reflective discussion questions to help the reader apply the strategies and procedures discussed this book will be invaluable to postgraduate students of tesol and applied linguistics and in service language teachers

the call to teacher leadership demonstrates the many ways teachers can be leaders without having to opt out of the classroom full time it examines formal leadership

positions instructional coordinators lead teachers department chairs etc as well as informal leadership roles nurturing colleagues supporting the instructional program participating in decision making etc with practical examples and case studies this book provides details about how teachers have participated in the leadership of their schools and districts examples come from elementary middle and high schools across the country

this book looks at the causes of teacher stress asks why thousands of teachers are leaving the profession every year and suggests way of preventing and coping

this book provides commentary on the influence of multi layered political contexts that surround the work of teacher educators worldwide it addresses the drawbacks of the massification standards based movements and marketisation of universal business that threaten authenticity innovation and entrepreneurship within teacher education on a global scale the chapters celebrate the richly described local stories that explore the often tacit political activity that underpins teacher educators work the book highlights the commitment of both teachers and teacher educators to social justice and human rights and critical consciousness as central to the process of teacher development teacher formation teacher education policies and curriculum development in an era of globalisation super diversity and the positioning of indigenous populations and national regulation and localisation are topics that are explored in this book
