the past decade has witnessed an explosion of interest and research on close relationships and social cognition in both areas numerous handbooks textbooks and journal articles have been published however it is the editors impression that although cognitive theories and concepts have filtered through to research dealing with close relationships much of this research reflects a relatively untutored understanding of the theoretical and empirical work in social cognition conversely the research literature that provides a more sophisticated perspective on the role of cognition in close relationships typically reveals a relatively limited knowledge of the literature on close relationships as researchers who have worked in both social cognitive processes and close relationships fletcher and fincham are convinced that each field has much to offer the other in fact their book is based on two important postulates first that a social cognitive framework offers a valuable resource for developing our understanding of close relationships and second that studying cognition within close relationships has the potential to inform our understanding of basic social cognitive processes
