why is money more valuable than the paper on which it is printed monetarists link the value of money to its supply and demand believing the latter depends on the total value of the commodities it circulates according to prabhat patnaik this logic is flawed in his view in any nonbarter economy the value we assign to money is determined independently of its supply and demand through an original and provocative critique of monetarism patnaik advances a revolutionary understanding of macroeconomics that highlights the propertyist position of karl marx and john maynard keynes unlike the usual division between classical economists e g david ricardo and marx and the marginalists e g carl menger william stanley jevons and léon walras patnaik places monetarists including ricardo on one side while grouping propertyist writers like marx keynes and rosa luxemburg on the other this second group subscribes to the idea that the value of money is given from outside the realm of supply and demand therefore making money a form in which wealth is held the fact that money is held as wealth in turn gives rise to the possibility of deficiency of aggregate demand under capitalism it is no accident that this possibility was highlighted by marx and keynes while going largely unrecognized by ricardo and contemporary monetarists at the same time patnaik points to a weakness in the marx keynes tradition namely its lack of any satisfactory explanation of why the value of money determined from outside the realm of supply and demand remains relatively stable over long stretches of time the answer to this question lies in the fact that capitalism is not a self contained system but is born from a precapitalist setting with which it interacts and where it creates massive labor reserves that in turn impart stability to the value of money patnaik s theory of money then is also a theory of imperialism and he concludes with a discussion of the contemporary international monetary system which he terms the oil dollar standard
