business education is a critical ingredient in establishing a viable middle class of managers in transitioning and developing economies compiled in association with the center for international business education and research this comprehensive examination of business and management education pedagogical models and curricula innovations in institutions around the world is the first such work to emphasize emerging markets

sustainable value management reveals a new space for studying business models the traditional approach is based on the assumption that the goal of any business is to make

money all decisions regarding supply and production should be made to maximize profit the discrepancy in creating non economic value is sometimes the result of separating ownership from control over an enterprise although shareholders are interested in maximizing profit management that actually makes decisions can also pursue other goals in addition to economic aspects the management intentions of modern managers are also influenced by factors arising from the organizational culture built co created within the organization and sometimes with the participation of external actors such as suppliers and customers the sources of the creation of social values will be the management intentions of top management often initiated by the adopted values and rules on the basis of which resources are bound within the structure of the business model the value of sustainability is based on the identification of those creative sources that relate to economic and social value economic value is created through social value and vice versa this allows the complementarity of the value created to be mutually supportive the business model that integrates both of these values should be more resistant to crises than the one that is oriented only toward producing economic value concurrent implementation of economic and social goals increases resilience and affects the success of modern business models this is due to the specificity of the business ecosystem that is built as part of the business model which in essence is based on the use of social factors to merge the business model into a complex ecosystem capable of producing value

in this second chronicle about deborah she faces an enemy whose sole purpose is to kill every human being in the universe the location of the enemy s home planets is unknown this enemy has unlimited ships and no concern about the high losses to their personnel the initial evaluation is that the enemy may not even be human they are given the name grays a creature like the grays seems rather harmless compared to what fiction shows you the grays went unchallenged only because they looked so weak and fragile no one saw them as a serious threat i can only think of the army ants on the march no one takes an ant seriously however an army of ants will devastate an area and kill every living creature the grays are the same type of threat to mankind as the grays are building up their fleets and personnel deborah desperately searches the known universe for additional personnel in this search she even goes to primitive nations the united states strips its military forces to provide as many personnel as possible despite this effort there are still not enough personnel deborah s scientists are working around the clock to not only upgrade her weapons but also provide her with new types of weapons ramah and the united states are making a maximum effort to prepare for the upcoming battle with the grays in this battle

either the humans or the grays will become extinct

what is cost plus pricing cost plus pricing is a pricing strategy by which the selling price of a product is determined by adding a specific fixed percentage to the product's unit cost essentially the markup percentage is a method of generating a particular desired rate of return an alternative pricing method is value based pricing how you will benefit i insights and validations about the following topics chapter 1 cost plus pricing chapter 2 monopoly chapter 3 perfect competition chapter 4 price discrimination chapter 5 profit maximization chapter 6 elasticity economics chapter 7 cost accounting chapter 8 markup business chapter 9 break even economics chapter 10 marginal cost chapter 11 marginal revenue chapter 12 ramsey problem chapter 13 gross margin chapter 14 cost curve chapter 15 total cost chapter 16 pricing strategies chapter 17 average variable cost chapter 18 demand chapter 19 shutdown economics chapter 20 total revenue chapter 21 monopoly price ii answering the public top questions about cost plus pricing iii real world examples for the usage of cost plus pricing in many fields who this book is for professionals undergraduate and graduate students enthusiasts hobbyists and those who want to go beyond basic knowledge or information for any kind of cost plus pricing
